## Bright Smiles Bright Futures

At Dr. Fuller's orthodontic office, we feel we can influence children in a lot of positive ways. Since the events of Sept. 11<sup>th</sup>, our lives have changed. We are seeing a dramatic increase in patriotism.

An issue that Dr. Fuller feels very serious about is our responsibility to our community and the importance of being a good citizen.

We have noticed that some of the adolescents in our practice do not feel this responsibility. They may not feel personally responsible because of their age.

Dr. Fuller and the staff feel the need to help everyone be aware of their responsibilities, because all of us enjoy the freedoms of our constitution.

In the 20<sup>th</sup> century alone, over 500,000 Americans have died defending our freedoms.\* We owe them and their families a lot for what we have today.

Our Military families are continuing to carry the torch for our freedoms. Several of our patient's Moms and Dads have been stationed aboard ships off of Afghanistan. They have been away at war, separated from their families for six months or more.

William Baker wrote an article entitled, "A Pupils Hope." He won a scholarship from the Veterans of Foreign Wars Voice of Democracy. In it he says, "With the Law of Harvest, what you plant you grow, what you sow you reap. We must plant the dream of a strong America into the hearts of every individual in this country. It is then that the United States will flourish like never before."\*\*

A first step in this process is to become aware of the privileges that we have in this country. We would like to invite our patients to tell us what freedom they enjoy that kids in other countries do not have.

We will publish your comments in the next issue. So jot it down or you may email us from the website; it's under Contact Us.
